BUSINESS PROJECT AS THESIS

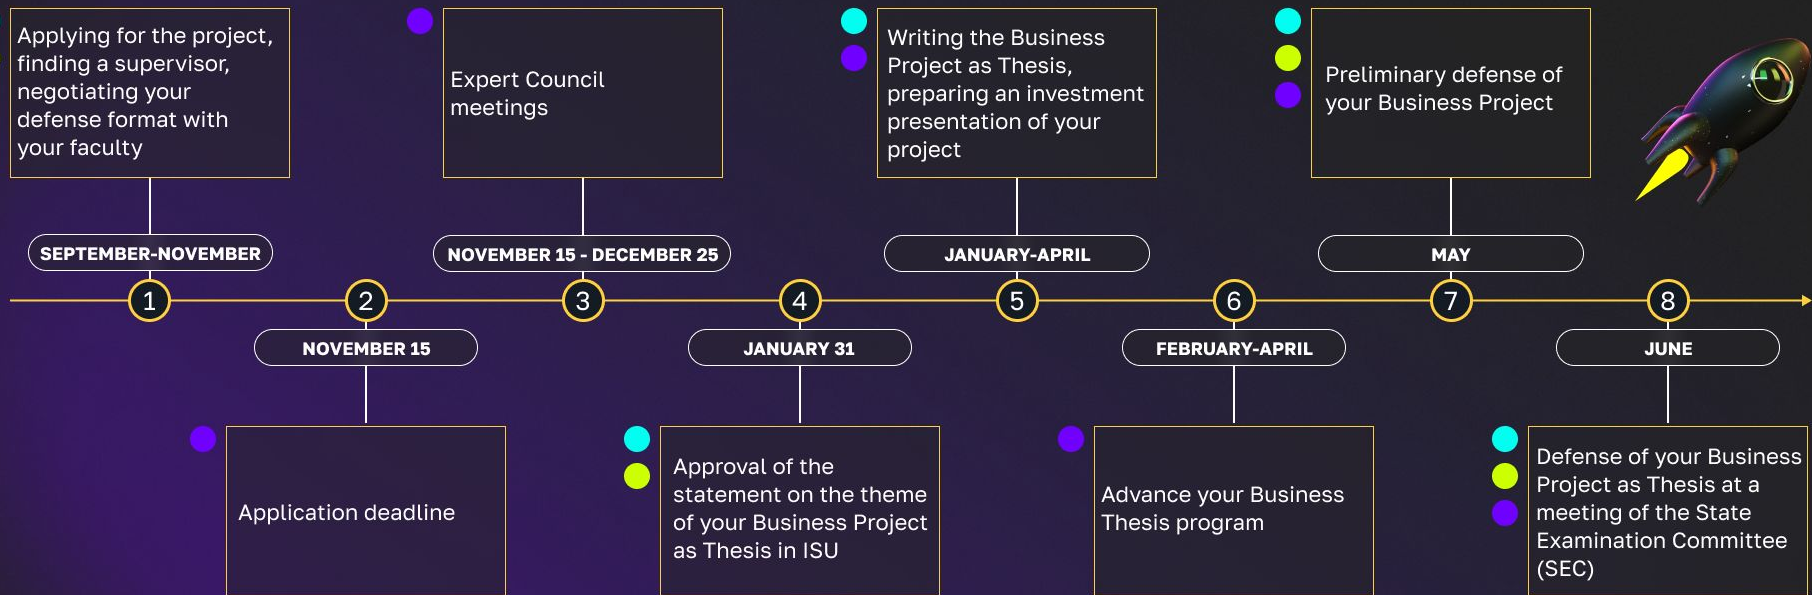

The Business Project as Thesis program allows students to work with leading experts in the field of technological entrepreneurship on various aspects of their projects

OUTCOME: INVESTOR PRESENTATION

BUSINESS PROJECT AS THESIS TIMELINE

- thesis supervisor
- head of educational program
- FTMI

Project fundamental value:

TECHNOLOGY:

- science (novelty, probability of success)
- economics of production (cost, budget and deadlines for refinement/ scaling, production sites)
- regulation (certification)
- digitalization/automation possibilities

INTELLECTUAL PROPERTY:

- defense strategy
- scope of rights
- validity

MARKET:

- main user scenarios
- target market
- competitive landscape and market share
- pricing

Project investment value:

TEAM:

- team members and their skills
- consultants

FINANCE:

- funding strategies
- necessary funds (to reach the nearest point of growth in value, enter the market, and/or break-even point)

BUSINESS VALUATION:

- payback period
- investment NPV and IRR
- suggested exit strategy

RISK MANAGEMENT:

- key risks and proposed actions to manage them

WHAT DO I GET FROM IT?

The program offers a unique opportunity to develop your project from an idea, a study, or a prototype to a commercially successful innovative product in a short period of time

Putting your skills and competencies into practice

Networking and the possibility to defend your thesis in a team of students from different fields

Participation in Russian and international startup competitions and acceleration events with support from ITMO's corporate partners

Consultations with leading experts in the field of technological entrepreneurship on the subject of your project

Packaging the project to attract your first investments

Launching your own startup

25 ITMO Students Win 1-Million-Ruble Grants for Their Startups

The Russian Foundation for Assistance to Small Innovative Enterprises has awarded grants of 1 million rubles to 25 ITMO students who were chosen as winners of the contest Student Startup.

SUCCESS STORIES

SilkInS

Spider web proteins added to creams heal cuts and blemishes

AEROSPACE-AGRO

System for operational monitoring of adverse situations in the fields based on AI algorithms

WARMR

Functional textile based on nano- and microprinted electronics and IT solutions

INSPIRÉ DU VIN

Hydrogel for accelerated regeneration of stretch marks

ALGAFOOD

Microalgae mutant strains

IONTRACK

Biochemical express tests for essential macronutrients in a saliva sample

**HOW CAN I APPLY FOR THE
PROGRAM BUSINESS THESIS?**

Can I participate in the program, if I don't have an idea for a startup or a team?

If you don't have an idea, you can always join one of the already existing teams. If you don't have a team, we will help you find like-minded people

You can find the current vacancies and projects in this page

Fill in this form to look for a team or a project

Can students of the same faculty and specialization participate in the same project defense?

Yes, but your roles on the team must be clearly defined.
The Business Project as Thesis can be done by a student:

- on their own;
- as part of a team formed by students of the same or different educational programs or faculties
- as part of a team with external participants.

How many members can there be in a team?

Your team must include at least one and no more than four members.

Can I choose a topic that is outside of my specializations?

No, because in your Business Project as Thesis (Business-Thesis) you will have to demonstrate a level of expertise sufficient for independent professional activity in the field of your educational program.

In what form should the work be presented? Do I need to do anything other than the presentation?

At ITMO University, a written thesis is **mandatory** regardless of its format. You can find more information about the current regulations for business projects as theses on the official page.

F.A.Q

Will participating in the Accelerator or Pre-Accelerator be of help?

Yes, this way you will get to work on your project in more detail, while also getting free support from mentors. As a bonus, completing the accelerating program can be credited as practical training.

Don't forget to mark your calendar for FTMI's annual winter intensive educational program Advance Your Business Thesis!

Stay tuned for announcements on the faculty's official VK page

What stage should the project be at by its defense in June-July? Could it be a detailed business plan or do I have to submit a project that was already proven to be successful on the market?

→ The program welcomes projects from different fields, which means that each of them will have a different timeline for launching an MVP. For instance, a life sciences project is associated with long-term scientific developments and research, which makes it very difficult to achieve significant results in one or two years. However, if your team is working on a mobile application, then it is fairly possible to produce an MVP within the same time frame. For each project, the team presents a roadmap, demonstrating what outcomes they want to produce by the time of their thesis defense.

WE WILL HELP YOU TURN YOUR IDEAS INTO REALITY
